PercoTop[®] For commercial vehicles

For a good-looking, durable finish

AXALTA COATING SYSTEMS

For most companies, image and recognition are the cornerstones of their brands. The logo, the livery, the packaging - everything is a customer touch-point. Commercial vehicles function as mobile marketing platforms. At Axalta Coating Systems we understand how important brand and image are to our customers, so we've made certain our high-quality commercial vehicle paint system PercoTop® not only looks good but also delivers the colour, performance and reliability they require.

That is why many major manufacturers of commercial vehicles, trailers and truck components have trusted and worked with us for decades. They know PercoTop® is unique and easy to use. The quality is robust and colour matching is accurate, quick and efficient.

Whether it's a refrigerated box superstructure, a standard trailer, a concrete mixer, a mobile crane, the chassis of an HGV, anything on or behind the cab, PercoTop® gives coaters flexibility in application, brilliance of appearance and the critical performance characteristics necessary to protect vehicle surfaces from weathering, graffiti and corrosion. PercoTop® has the added benefit of being very robust in application - especially on large surfaces or on complex shapes - and dries very quickly. With PercoTop® you don't just get the paint, but all the knowledge and support, backed by Axalta Coating Systems.

All you need

There is no such thing as a standard commercial vehicle or trailer. They come in all shapes and sizes and with all manner of substrates - from aluminium to steel, plastic to glass-reinforced polyester. Yet regardless of the substrate, the finish must not only look uniform, but also dazzle in order to fulfil its marketing role. Whatever the weather, the mechanical stress, the chemical attack, the amount of UV radiation or the degree of use, commercial vehicle coatings have to maintain their excellent finish.

From primers to topcoats, PercoTop® is a complete paint system for commercial vehicle components and trailers that provides the robust, durable protection they need to stay looking good on the road for years. Its outstanding mechanical properties and exceptional colour stability translate into reliable, long-term performance. Whatever the requirements for protection, durability and application, PercoTop® is the right paint system for you.

PercoTop® performance highlights

- Uniform colour and texture
- Extensive colour range
- Superior productivity from improved processes
- Extremely tough durability
- Considerable pollution resilience
- Scientifically-proven performance
- Various gloss levels from high-gloss to matt
- Good coverage from highly pigmented paints
- Lead-free
- ISO 9001 and ISO TS 16949 certified manufacturing, R&D and quality management

Flexible and efficient

PercoTop® is a particularly user-friendly and efficient coatings system. It is also uniquely innovative. Thanks to an advanced tints and binder system, more than 15,000 colours can be produced in almost every conceivable CV-paint grade quality, quickly and effectively. While perfectly coordinated components minimise mistakes, the modular system also means less capital is tied up in inventory. Larger paint quantities are available in ready-mixed colour batches tailored to individual customer specifications.

Well-matched primer materials provide excellent adhesion and outstanding corrosion protection, while clears create the optimum surface finish. This flexibility of the PercoTop® system and its high level of performance ensures a wide range of applications. In addition, special additives are available to achieve various degrees of gloss. From matt to high-gloss, from Medium Solids to VOC compliant High Solids - PercoTop® will meet all your commercial finishing needs.

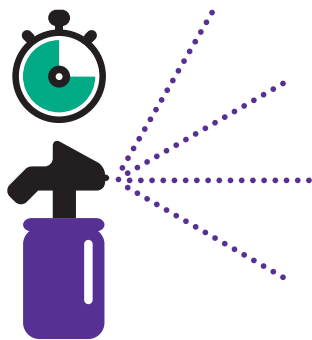

Support when you need it

We measure our performance by how well we support our customers. We know and understand their needs. When you choose PercoTop® for commercial vehicles, you not only get a unique paint system, but also specialist support. Our team of experts assist our customers with process improvements, application training, specification documents and will help to identify the correct paint systems for every substrate and vehicle shape, including large surfaces with overlapping spray zones.

As part of our commitment to our customers, we have ensured that PercoTop® is as easy to use as it is to dry. The paint can be applied with all customary application equipment such as conventional spray-guns, high-pressure, airless or air-mix coating processes. PercoTop® dries well too, whether by air, oven or infrared.

The result is a perfect coating - every time.

PercoTop® application highlights

- Great flexibility in colour matching
 - Highly efficient modular coating system
 - VOC-compliant thanks to modern HS technology
 - Wide application window
 - Excellent sagging resistance
 - Fast-drying
 - Multi-toning
 - Colour and application support
 - Comprehensive training programmes
 - Direct to metal and structure topcoat systems available as add-ons
 - Special primers for corrosion protection in marine environments
 - Clear-over-base system available
- PercoTop® - our job is to make yours easier.

100% coatings

Axalta Coating Systems has but one aim: to make high-performance paints that benefit our customers. That's why our focus is on innovation, quality and service - all cornerstones of our brand. We are passionate about making the coatings the market needs. That means delivering a wide range of colours, high performance, good coverage, durability and dazzling shine, as well as cutting-edge, sustainable technology and fast, reliable customer support.

As coating specialists for more than 145 years, we are the only leading global coatings company dedicated solely to the development, manufacture and sale of liquid and powder coatings. From general industrial to architectural and transport coatings for both original equipment manufacturers and refinishers, we are constantly working to advance quality, productivity and efficiency. Our state-of-the-art products and services include paint, colour matching tools, application technologies, customer training and business management systems.

**Science and technology. Speed and flexibility.
Quality and innovation.
