

## LEAN FOUNDATIONS: Tools and techniques for improving bodyshop efficiency and profitability

### EDUCATION

### Course Overview

Collision repairers are constantly looking for ways to improve efficiency and profitability. The principles and tools of Lean provide an ideal foundation for removing waste and improving your process to drive efficiency and profitability. Often short-term gains or improvements are made, but process improvement either stalls or regresses.

This one-day course will provide you with concepts and tools to help challenge and refine your processes using the knowledge and skills of your people.

#### Voice of the Customer

The "Voice of the Customer" is the first principle of Lean, it is the compass that drives the direction and the decision-making process.

#### Understand the principles of Lean Principles

Following a review of the 5 principles of Lean understand how they are designed to drive the thinking of the business and to reduce waste. There are 12 tools of Lean which are used to drive efficiency and profitability. The principles and tools will be reinforced through exercises. To challenge attendees, we will also work on applying these methods to various collision repair problems such as:

- Reducing cycle times
- Minimizing booth times and
- Standardisation of processes.
