

### EDUCATION

### Course Overview

Collision repairers are constantly looking for ways to improve efficiency and profitability, while eliminating bottlenecks within their shop.

This one-day course specifically looks at the paintshop and the steps with in the Refinish process. It will identify opportunities where productivity can be improved, and efficiencies gained. It will also discuss how to increase capacity (where needed) without large capital investment and how to optimise the use of paint and materials to benefit your shop.

#### Key areas discussed in this training include:

- **Paint Mixing** - best practice for successfully matching and mixing paint, reducing waste and associated paint costs.
- **Paint Preparation** - best practice vehicle paint preparation that will improve the paint process flow and reduce paint related rework.
- **Paint Staging** - best practice for staging a vehicle prior to the paint application, including masking & cleaning.
- **The Paint Process** - best practice for vehicle painting to achieve a flawless paint job.
- **Error Proofing the Paint Process** - focus on the required personal protective equipment and guidelines for cleanliness in the mixing area and the paint booth to reduce common errors.
- **Material Replenishment System** - how to help create a demand-driven system
- **Buffing** - achieving the balance between a high-quality final output versus reducing cycle time.

## EDUCATION

### Who Should Attend?

Bodyshop Owner or Manager, Foreman, Leading Painter.

### How does this course differ from similar courses in the repair industry?

- Taught using a highly interactive guided learning model to keep attendees engaged in the learning process.
- Numerous hands-on exercises related to the collision industry, which emphasise the principles taught. You can also use the exercises in your bodyshop during your own implementation.
- I-CAR certified and eligible for credit points.

<b>Cost:</b>	Axalta Customers:	\$150 for first attendee \$100 for subsequent attendees
