

Nason[®] Industrial NI-680 PU DTM 2K Topcoat

The NI-680 Polyurethane (PU) Direct-To-Metal (DTM) 2K Topcoat is part of Nason Industrial's extensive offering engineered to offer both VERSATILITY and VALUE. Specifically formulated, the NI-680 Topcoat is a 2 pack direct-to-metal, high film build isocyanate cured polyurethane that delivers superior coverage and gloss retention.

The NI-680 Topcoat uses custom colour mix binder ST100-680 and concentrated Nason Industrial tints to enable matching of industrial colours, meeting the ever-growing needs of the general liquid industrial market. The resulting highly durable coating delivers good weathering and anti-corrosion properties for longer lasting finishes that keep your equipment looking great at an affordable price.

NI-680 PU DTM 2K TOPCOAT

Over 1,400 colours have been developed across Spectramaster Colour Atlas, RAL and AS2700 for direct-to-metal application on hot rolled carbon steel, weathered and properly treated galvanized steel and aluminium.

PRODUCT FEATURES

- Excellent mechanical properties
- Good weathering durability
- Good anti-corrosion properties
- Good appearance
- Tintable

PRODUCT BENEFITS

- Long lasting film integrity and durability
- High quality glossy finish
- Extended service life
- Use for manufacturing and material handling
- Fast turnaround time and high productivity

PRODUCT USES / APPLICATIONS

- Commercial transport and components
- Mobile mining, earth moving, construction, agricultural equipment and attachments
- Fabricated structural steel handrails
- Material handling equipment
- Industrial plant equipment and machinery (including chemical plants)
- Pipeline and tank exteriors
