Nason[®] Industrial NI-690 ISO-Free 2K Topcoat

The NI 690 ISO-Free (SF) 2K Topcoat is part of Nason Industrial's extensive offering engineered to offer both VERSATILITY and VALUE.

ISO-Free NI-690 has been specifically formulated to offer an isocyanate-free acrylic option based on amine-epoxy functional acrylic polymers, plus is activated 2:1 with its unique ISO-Free Activator. The resulting durable coating delivers good weathering and anti-corrosion properties when combined with Nason Industrial primers, for longer lasting finishes that keep your equipment looking great at an affordable price.

NI-690 ISO-FREE 2K TOPCOAT

Simply use a NI-610 2K colour formula and replace the binder component one for one with NI-690 during mixing. There are over 1,400 formulas available in combination with the spectrophotometer generated local formulas.

PRODUCT FEATURES

- Isocyanate free product
- Good resistance to sunlight exposure
- Tough finish
- Fast drying

PRODUCT BENEFITS

- Can be applied in situ
- Longer exterior service life
- Hard wearing coating
- Early handling
- Suitable for interior and exterior applications
- Cleaner working environment

PRODUCT USES / APPLICATIONS

- General steelwork, where aesthetic appearance is required
- Shopping complexes and sporting arenas
- Handrails
- Agricultural and farm machinery
- Trucks, forklifts, tankers, tank exteriors
- Industrial and mining equipment
- Chemical plants, electrical generating equipment
- Concrete walls
