

Nason[®] Industrial Easy Clean Clear Coat

Nason Industrial Easy Clean Clear Coat is a protective, easy clean coating that can be used for a vast array of industrial, architectural and heavy duty transportation applications. It provides a durable protective shield against dirt, chemicals, UV and an easily cleanable surface.

The product boasts an array of features including outstanding surface repellency, which makes coated surfaces easy to clean with a cloth or mild solvent. This means there is low dirt pickup and staining.

For an added peace of mind, the excellent anti-graffiti properties minimise graffiti ghosting by stopping the absorption of graffiti. In turn, the cost of graffiti removal is minimised, as the removal becomes a simple and quick process.

These properties make it a perfect coating for:

- Commercial vehicles, trains and trams
- Surface areas subject to dirt and graffiti (eg. street furniture, council facilities).

Nason Industrial 222-38[™] Easy Clean Clear can also be used as a binder to replace NI610/620 binders in Nason Industrial 2K topcoat colour formulations, to generate EC2K topcoat. Once the colour is mixed up, it can be processed in exactly the same way as 222-38[™] Easy Clean Clear in terms of activation and reduction for spraying.
