New PercoTop® 9675

Good just got better.

At Axalta Coating Systems, we work on innovation to achieve continuous improvement for the industrial market. That's why we have upgraded PercoTop® 9675, our proven topcoat system. This high solid polyurethane topcoat is the preferred choice for giving complex shapes and large surfaces an excellent finish.

PercoTop® 9675 is a low VOC, 2-component solventborne polyurethane topcoat specifically developed for the commercial vehicle market. It is aimed at manufacturers of standard and refrigerated box superstructures for commercial vehicles, as well as makers of concrete mixers and pumps, cranes, waste disposal vehicles and earth moving equipment.

The new PercoTop® 9675 has an improved application window and even better appearance. A broad selection of activators and thinners make it adaptable to a wide range of equipment and climatic conditions to achieve optimum results.

This topcoat results in a smooth, high-quality finish after one or one and a half coats, depending on the colour and substrate. It offers excellent sagging performance and flow, especially on complex shapes with overlapping spray zones.

PercoTop® 9675 has been specially designed to suit airless, air-mix or electrostatic application equipment without the risk of air-entrapment and foaming. It is also well suited for conventional, HVLP and high-pressure spray equipment.

Reduced application time, good coverage and very short drying times are key advantages of PercoTop® 9675, which will boost the productivity of any paint shop.

Consistent application, an excellent finish, increased efficiency, a low solvent content, as well as outstanding colour accuracy - PercoTop® 9675 guarantees excellent results, every time.

Highlights

- 2K high-solid polyurethane quality
- VOC under 420 g/l
- Smooth finish
- Easy application
- Universal application parameters (optimised for electrostatic and air-mix applications)
- Outstanding flow control
- Lower application time: 1 or 1.5 coats
- Reduced material consumption
- Fast drying
- Wide colour availability
- Excellent appearance
- Excellent mechanical properties
- Excellent chemical resistance
- Excellent weathering resistance characteristics
