PercoTop® 611/633

Industrial
topcoats for
single layer
applications.
Completely
reliable.

PercoTop® 611 2K DTM topcoat for use on interiors and the PercoTop® 633 2K DTM topcoat for use on exteriors from Axalta Coating Systems are designed for very specific industrial applications that value productivity.

When application speed, excellent adhesion, good corrosion protection and mechanical resistance matter, PercoTop® 611 and PercoTop® 633 are what you need. Both are two-component, polyurethane-based solvent-borne topcoats for direct-to-metal application on an enormous variety of industrial and architectural uses. They are ideally suited for machines, advertising boards, switchboards and road signs.

Both products boast excellent adhesion and corrosion protection for every type of metal substrate, from steel to aluminium and galvanised steel. Their extreme resistance to mechanical stresses strengthens the robust nature of these topcoats even further.

With PercoTop® 611 and PercoTop® 633 you don't need to use a primer. That means significant savings in time and materials, as well as having a positive impact on productivity. It's also why these topcoats are the best choice for economical applications.

PercoTop® 611 and PercoTop® 633 are supplied as topcoat qualities. They consist of unique, high-quality mixing tints in combination with a special one stage binder and a large selection of activators, thinners and additives. Any topcoat colour you want can be mixed in any quantity on site.

Application of both topcoats is simple. They can be applied using all traditional coating systems including conventional, HVLP, high pressure, airless and air-mix systems.

PercoTop® 611 and PercoTop® 633 effectively answer all industrial finishing needs for single layer interior and exterior applications. PercoTop® 633 has outstanding UV stability and is therefore particularly suited for use on exteriors.

There are two further versions available on special request:

- PercoTop® 617 as a 2K, DTM system dries very rapidly - the best choice when parts need to be packed quickly.
- PercoTop® 477 is ideal as a 2K, DTM structured coating - the right system, when you want a simple, but robust coating

Highlights

- 2K polyurethane base
- Uniform finish
- Good corrosion protection
- Outstanding adhesion
- Excellent mechanical properties
- Easy application
- Universal application parameters
- Fast curing
- No primer necessary
- Large colour range
- Reliably robust
- PercoTop® 633: for industry-leading UV resistance
- PercoTop® 617: for an extremely fast, economical alternative
- PercoTop® 477: for structured surfaces
