

CASE STUDY: STEAM BOILER CONTROL PANEL

LOCATION: JAKARTA, INDONESIA

MARKET: ELECTRICAL

REQUIREMENT:

Protection of sensitive electrical equipment in an industrial environment. Customer wanted to protect expensive electrical and electronic equipment and extend its working life by means of planned maintenance.

SURFACE PREPARATION:

None required.

COATINGS:

Trials were carried with Corroless CCI V12 in a steam boiler control panel. These were successful and the product was then adopted for all appropriate electrical and electronic equipment within the factory.

PRODUCT:

Corroless CCI V12 protects 12 cubic feet of air space (0.34m³) for up to 2 years, depending on environmental conditions.
