

PAINTSHOP OPTIMIZER

Analyze. Optimize. Improve.

- Expert consultancy including on-premises training sessions, professional and customized business advice and ongoing performance checks either in person or online.
- Enhanced job card management within Nimbus, seamlessly connecting with your existing job card management system to help you get more from your current resources.
- Cloud-based reporting via Nimbus Insights gives you a complete overview of paintshop performance. No installation required!

Axalta Drivus supports professional refinish bodyshops with innovative services, helping them to optimize their processes and increase their efficiency and profitability.

RAISE YOUR PAINTSHOP'S PERFORMANCE AND PROFITABILITY

Benefit from expert consultancy combined with the advanced capabilities of Nimbus Insights - a powerful, cloud-based analytics module within the Axalta Nimbus platform. Together they improve your paintshop's profitability and day-to-day performance by giving vital information on relevant aspects of your paintshop operations.

01

PERSONAL CONSULTANCY

Get expert, hands-on advice from your own Axalta Drivus consultant who will help you continuously improve performance over time and support you in achieving more profitable results.

02

OPTIMISED PERFORMANCE

Your Axalta Drivus consultant will evaluate your current status and customize Nimbus Insights to your paintshop. It gives you a detailed overview of processes, material usage and employee performance.

03

IMPROVED BODYSHOP MANAGEMENT

Paintshop Optimizer - the combination of Axalta Drivus consultancy and Nimbus Insights gives you key business information in an easy to understand way so you know where improvements can be made.

04

SPOT NEW OPPORTUNITIES

By continuously monitoring every aspect of paintshop performance, you can spot trends and exploit them for business advantage.

Your Axalta expert will help you to continuously analyse and optimize paintshop performance and profitability step-by-step over time. With data from Nimbus Insights you can easily track your gross margin, monitor operational efficiency, and stay in control of overall performance in real time.
