Who we are and what we do

Industrial Liquid Coatings is a business unit of Axalta Coating Systems, dedicated to the development, manufacture and sale of liquid and electrodeposition coatings for our industrial customers.

From agriculture, construction and earth moving equipment, automotive components and general industrial coatings, we work to advance quality, productivity and efficiency.

Industrial applicators benefit from our extensive range of primers, topcoats and clearcoats. PercoTop®, our premium product line of spray coatings, provides outstanding corrosion protection and optimum surface finish on a wide range of substrates. Whatever the requirements for protection, durability and application, PercoTop® is the right paint system for you.

Axalta's AquaEC electrocoats are high-performance products that are formulated to provide reliable mechanical strength and superior corrosion protection. We offer a portfolio of qualified electrocoats formulated to meet unique customer needs. AquaEC is chosen by many manufacturers of automotive parts, seats, appliances and agricultural equipment.

High performance paint meeting your demand.

News!

From our waterborne product range

Our new single layer paint PercoHyd® 060 performs on shock absorbers, gas springs and on plastic parts. Corroless® VOC is an innovative VOC free primer providing excellent corrosion protection.

PercoHyd® 060 WB 2K Direct-to-metal single layer

- Waterbased paint system with low solvent content
- Economical one-layer paint system (direct-to-metal)
- Easy handling, easy mixing of components
- Suitable for many types of application (bell, disk, spray gun)
- Fast drying time
- Excellent corrosion protection
- High chemical resistance
- Good coverage of welding seam
- Easy cleaning of application device
- Good printability
- REACh compliant
- Available globally

Corroless® VOC Primer

- High Performance 2K Waterbased Epoxy Primer
- Solvent-free state-of-art technology
- Designed to offer excellent corrosion protection (1000+ hrs NSS)
- Allows high throughput - 30 minutes recoat time with waterbased topcoat
- Easy to apply and very robust sagging performance (>200µ)
- Excellent filling properties - mixed solid content of 64%

PercoTop® Our premium product line

**We are constantly striving for
improving the performance of
our industrial liquid coatings!**

Our PercoTop® spray coatings are made to satisfy demanding specifications, whether that is in agriculture, construction and earth moving equipment, automotive components, general industrial or architectural and decorative applications.

Full range of PercoTop® products available for your individual need!

Primer

PercoTop® 1K Primer 010

Very fast drying primer with excellent adhesion

PercoTop® 2K HS Primer 040

2K High-Solid-System based on polyurethane resins

PercoTop® 2K VHS Power Primer 4000

Very low-emission, fast drying 2K very high solid polyurethane primer. Can be used as an adhesion primer, primer filler, sanding filler or high-build filler

PercoTop® 2K Epoxy Primer CS381

2K epoxy primer for the highest chemical resistance and optimal corrosion protection of metal substrates

Topcoat

PercoTop® 449 2K Structure Topcoat

Silicone-free, structured 2K polyurethane topcoat offering a wide range of structures

PercoTop® PUR 2K MS Topcoat

Polyurethane technology for smooth finishes combined with weather resistance and chemical resistance

PercoTop® 9675 2K HS Topcoat

This 2K high solid polyurethane topcoat is the preferred choice when complex shapes and large surfaces require an excellent finish

PercoTop® 611 2K DTM Topcoat

Industrial topcoat for single layer applications. Completely reliable

PercoTop® 9700 2K HS Topcoat

2K high solid polyurethane topcoat, has excellent flow and delivers excellent long-term colour and gloss retention

PercoTop® KH 1K KH Topcoat

1K topcoat of oxidatively cross-linking alkyd resins with easy application, very fast drying and high opacity

PercoTop® 1K Acrylic Topcoat

1K solvent-based topcoat, very fast drying and highly elastic. Filled into spray cans, it is suitable for small repairs on powder-coated objects, such as window frames and doors

Clearcoat

PercoTop® 2K HS Clearcoat CS805

Productive high solids clearcoat based on acrylic resins

PercoTop® 2K Power HS Clearcoat CS807

High solids 2K polyurethane clearcoat. It is ideally suited for large surfaces and objects with complex geometries

PercoTop® 2K HS Clearcoat CS870

A versatile high solids 2K polyurethane clearcoat. It is particularly easy to work with and provides excellent flow and good adhesion

Our specialties

These special products complement our product portfolio:

Corroless Protective Coatings

Now part of Axalta Coating Systems, the Corroless name has been known worldwide for decades. Corroless™ provides highly efficient corrosion protection solutions for steel structures, pipework and offshore structures.

Wheel coatings

Wheel coatings have to look good under tough conditions and to resist many aggressive chemicals. They should also be stable under UV radiation and to protect the wheels from corrosion. Our coating systems for aluminium and steel wheels meet all these requirements.

Skis and Recreation Equipment

Axalta Coating Systems has been the partner of choice for the leading manufacturers of skis for a long time. They trust our coating systems to protect skis from top to bottom, no matter which side of the ski needs to be coated.

Interior drum coatings

Used to protect the inside of metal drums and black plate, tinplate and aluminium containers so they can be used safely as packaging for all kinds of filling goods. We have tested our interior drum coatings' resistance to more than 1,400 different filling goods.

Glass coatings

Our glass coatings provide beauty and protection for luxury cosmetics and beverage containers. Axalta Eleglas combines excellent abrasion and chemical resistance with highest aesthetical standard, available in many colors and effect finishes. With Axalta Eleglas Fragment Shield we offer a shatter-proof glass coating.

Axalta Color Solutions Center

Come and discover our new small scale production facility close to Frankfurt. Here, we develop industrial liquid coatings and produce them in small quantities - The professional solution for meeting big demands in small quantities!

We stand for...

**Color development
expertise**

**Product
modification**

**Fast execution
from task to solution**

**Fast delivery
of small batches**
