

Industrial Waterborne Coatings

Imron Industrial™ Hydro

Axalta General Industrial waterborne products are designed to demonstrate that environmentally responsible technologies can be as productive and as easy to use as solventborne coatings. We have formulated Imron Industrial Hydro, a versatile and environmentally responsible paint system that offers not only excellent durability, but also excellent productivity in use.

Waterbased 2-component epoxy primers are developed for industrial applications. With excellent filling properties, they reliably protect steel and aluminum against corrosion.

Primers:

- IIH311: Yellow
- IIH312: Grey
- IIH313 : Black
- HT206: Activator

Waterbased 2-component PU Topcoat with high weather and gloss resistance developed for industrial applications.

Topcoats:

- IIH901: Binder Gloss
- IIH902: Binder Matte

Activators:

- HT201: Standard
- HT204: High Temperature
- HT202: Spray Application

Thinner:

HT300

Application Methods:

Airless Spray & Conventional Spray

Imron Industrial Hydro offers a wide range of tints for creating diverse colors and effects across various paint qualities. Large paint quantities are readily available in custom-made color batches to meet individual customer needs.
