

Alesta® AP AntiGraffiti Outdoor

A powder coating to eliminate graffiti in outdoor applications.

In response to market needs and to counteract vandalism of public facilities, Axalta Coating Systems has developed a range of anti-graffiti powder coatings.

Alesta® AP AntiGraffiti Outdoor provides proven anti-graffiti performance combined with all the advantages of the Alesta® AP gloss range of products. In particular it offers excellent weathering resistance and very good mechanical properties. It is especially intended for the protection of outdoor parts that are exposed to graffiti: construction, urban furniture, bus stations, parking meters, railway stations and equipment including switchgear, signals, bridges, machinery ...

- This specific Alesta® AP AntiGraffiti Outdoor range has been formulated to meet the requirements of the well-known associations in the architectural market: QUALICOAT and GSB.
- Regarding anti-graffiti properties: They have been tested with success by the Dr. Kupfer laboratory from the German association Gütegemeinschaft Anti-Graffiti.

Alesta® AP AntiGraffiti Outdoor was developed and formulated by our laboratory experts using several cleaners validated by the market players (including Arcane gel, Scribex etc). For more information, please consult us.

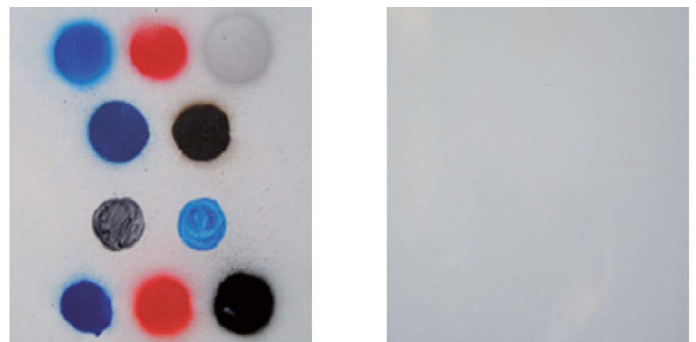

Axalta Coating Systems offers a wide range of colours in gloss appearance. Please contact us for details.

Highlights

- Any colour (Ral, NCS, Pantone, BS...) can be formulated in gloss, quality and a wide range of formulations already exist
- Anti-graffiti properties in one single layer (Gütegemeinschaft Anti-Graffiti)
- Economy, rentability improved – only one layer
- Very good resistance to UV

- Very good mechanical properties
- Standard curing conditions
- Compatible with other chemistries without any specific cleaning of the coating lines
- Suitable for both outdoor and indoor applications
- QUALICOAT Class 1 and GSB Florida 1 (Standard) certified

Results of the basic test

Before and after 15 cycles of graffiti and cleaning
