STATEMENT OF INTENT

Axalta Coating Systems Canada Company is committed to playing a leadership role in protecting the environment. Whenever feasible, we will eliminate, or reduce the use, creation and discharge of cyclohexane, in full compliance with all federal and provincial regulations. Toxic use reduction will be an ongoing effort for Axalta Coating Systems Canada Company, and we will continue to monitor technological advancements to ensure that reduction options that are both technological and financially viable are implemented at our facility.

REDUCTION OBJECTIVES

Where technically and economically feasible, our goal is to reduce the use of the toxic substance at the facility. After careful consideration, Axalta Coating Systems Canada Company is unable to identify a viable reduction option that can be implemented to reduce the usage of cyclohexane.

DESCRIPTION OF SUBSTANCES

Cyclohexane is used only in the paint and dispersion making process.

TOXIC SUBSTANCE REDUCTION OPTIONS TO BE IMPLEMENTED

No viable reduction option could be identified for **Cyclohexane**.

Company Name : Axalta Coating Systems Canada Company

Substance : Cyclohexane

CAS # : 110-82-7

Reduction Option : No viable option is available at this time

After careful consideration, Axalta Coating Systems Canada Company is unable to identify a viable reduction option that can be implemented to reduce the usage of cyclohexane. Raw Material substitutions and production reformulations were explored and found to be not technically feasible at this time. Options to improve yield and reduce waste were also considered. Reductions in usage offered by these options were estimated to be negligible in amount and implementing these options is not economically viable.
