Explanation of the Pictograms

The leading car paint manufacturers have agreed on a standardized symbol language that can be understood internationally.

To ensure that the information required to produce a perfect finish is understood accurately and quickly by everyone, a linguistically neutral system of pictograms has been chosen. These pictograms are used in technical data sheets, on product labels and on the microfiche. The meaning of the individual pictograms is given in this data sheet.

This product is for professional painting of vehicles only.
## Preparation
- Cleaning

## Mixing
- Sanding
- Mixing ratio (2 components)
- Mixing ratio (3 components)
- Use of measuring stick
- Addition of hardener
- Addition of additive (Measuring cap)

## Reduction of viscosity
- Application viscosity

## Application
- Gravity feed gun
- Suction feed gun
- UBE gun
- Coats (with gravity feed spray gun)
- Coats (with suction feed spray gun)
- Coats (with aerosol can)
- Application with putty knife
- Application with brush
- Application with roller
### Drying
- Flash off
- Drying time
- Drying time with infra-red

### Storage
- Store away from frost
- Store in cool place
- Protect from damp

### Further steps
- Sanding by hand wet
- Sanding by hand dry
- Orbital sander wet (DA)
- Orbital sander dry (DA)
- Flat-bed sander wet
- Flat-bed sander dry
- Polishing

### Miscellaneous
- Close tin
- Hand stirring
- Stirring in the mixing machine
- Compare color
- See technical data sheet
