Amarium™ Premium Pre-Catalyzed White Lacquers

1. PRODUCTS
   • NUW3619 - Gloss
   • NUW3614 - Soft Gloss
   • NUW3612 - Satin

2. MIXING RATIO
   • All products should be stirred well before use and, for best results, continuously agitated while in use.

3. SHELF LIFE @ 77°F (25°C)
   • 12 months

4. CLEAN UP
   • Dispose of dirty solvent and cleaning rags in a safe and compliant manner. Solvent or lacquer soaked rags should be stored in water-filled, closed containers prior to disposal.

5. ADDITIVES

6. SURFACE PREPARATION
   • Surface must be clean and dust free with a moisture content of 6-8% prior to finishing. Remove all dust, dirt, wax and wood marks. Proper sanding and preparation of the wood is critical to achieving consistent results.
   • On new wood, finish sand surface with 150-180 grit sandpaper
   • On previously finished wood, remove all old paint or varnish and follow new wood procedure.

7. COMPANION PRODUCTS
   • NUW3610 – Amarium™ White Pre-Catalyzed Lacquer Undercoat -550VOC

8. TECH NOTES
   • No thinning is recommended.

9. SUBSTRATES
   • Commonly used furniture and cabinetry woods
   • MDF/HDF
   NOTE: Not to be used on exterior applications

10. APPLICATION
   • Apply at a rate of 3-4 wet mils per coat. Sand between coats with 240-320 grit, no fill sandpaper. This finish must be sanded between coats for proper adhesion. DO NOT APPLY more than three coats at 3-4 wet mils per coat when used in conjunction with the undercoat.
   • Maximum film thickness of the total coating system MUST NOT EXCEED 4 dry mils.

11. FLASH / DRY TIMES
   AIR DRY @ 77°F (25°C)

Clean Up:

Refer to your local regulations for compliance requirements for cleaning solvents. Dispose of dirty solvent and cleaning rags in a safe and compliant manner. Solvent or lacquer soaked rags should be stored in water-filled, closed containers prior to disposal.

Application Notes:

General:
Always pre-test the system on your substrate to verify suitability of the application.
First-Prime the wood with NUW3510 Amarium™ Pre-Catalyzed White lacquer Undercoat-550 VOC for best results.

Tinting: This product can be tinted with approved, high quality industrial colorants. (Check with your Axalta Distributor approved colorants). NEVER tint with colorants that contain glycol. Maximum tint load is 4 oz per gallon (3% by volume). Colorants must be mixed in completely with mechanical agitation before use. Apply by spray only, using Conventional Air, HVLP, Airless, or Air Assisted Airless equipment. Apply at a rate of 3-4 wet mils per coat. Sand between coats with 240-320 grit, no fill sandpaper. Remove sanding dust before applying the next coat. This finish must be sanded between coats for proper adhesion. DO NOT APPLY more than three coats at 3-4 wet mils per coat when used in conjunction with the undercoat. Maximum film thickness of the total coating system MUST NOT EXCEED 4 dry mils.

Drying Time:

Dry to Touch: 15-20 minutes
Dry to sand and recoat: 30-45 minutes (depending on ambient conditions).

Do not apply if the material or substrate temperature is below 55°F.

This product is best applied when surface and air temperatures are between 55°-90° F (12-32°C) and when relative humidity is below 50% during application and drying time.

Warning:
Always pre-test the system on your substrate and under your line conditions to verify suitability to the application and avoid potential need for costly refinishing. All dry times listed are as tested under ideal indoor environmental conditions of 78°F (26°C) with relative humidity not exceeding 50%. These products are recommended for use under temperature conditions of 60-100°F (16-38°C) and when relative humidity is below 50% during application and drying time. Low temperatures, poor air circulation or high humidity will extend dry times. Axalta strongly recommends against use of these products if temperatures of air, material, or surface to be coated are below 60°F (16°C) or below the dew point. Abnormal conditions of temperature or humidity may adversely affect product performance. Please contact your authorized Axalta Industrial Wood Coatings distributor for additional product use recommendations and finishing guidance.

Additional notes:
Do not mix with other finishing systems or deviate from these finishing recommendations. Axalta will not be held liable for finish failures resulting from the mixing of products or deviations from finishing recommendations.

Storage:
Store in a cool, dry place. Close all containers after use. Do not store near heat or sparks. Spills should be cleaned up with non-sparking tools. See the product MSDS for complete safety information.

These products are recommended for professional application and are designed for interior use only. Always pre-test the system on your substrate and under your line conditions to verify suitability to the application and to avoid potential need for costly refinishing. Axalta Industrial Wood Coatings are designed to protect and enhance the natural beauty of wood, but cannot eliminate natural discoloration or deterioration of wood as it ages.
