

AN AXALTA COATING SYSTEMS BRAND

**CORROLESS**®  
PROTECTIVE COATINGS

A photograph of an industrial refinery at night, illuminated by numerous lights. The scene features several tall distillation columns, complex piping, and structural steel frameworks. The sky is a deep blue, and the lights create a strong contrast against the dark background. The overall atmosphere is industrial and active.

# PROTECTIVE COATINGS

Axalta has more than 150 years of experience designing high performance products that shield substrates against the most aggressive environments. Corroless' full suite of protective coatings protect metal components against degradation due to moisture, salt spray, oxidation or exposure to a variety of environmental or industrial chemicals. These anti-corrosion products are designed to provide long-term protection and act as a barrier to inhibit the contact of chemical or corrosive materials.

# UNYIELDING PROTECTION

## Products:

Tested to the most demanding standards by independent national and international authorities, Corroless products have proven, real-world, reliable performance.

- » Rust Stabilizing Primers
- » Reinforced Finishes
- » Corrosion Inhibitors

## Applications:

Axalta's user-friendly coatings offer outstanding protection, while providing a sustainable coating solution for long-lasting and durable functionality. Corroless provides a wide variety of coatings, ensuring protection in the harshest conditions.

Axalta offers coating solutions for applications such as:

- » Steel and concrete structures
- » Internal and external pipelines
- » Offshore splash zones
- » Bridges
- » Chemical plants
- » Field joints

## Benefits of Protective Coatings:

Corroless is committed to the management, protection and rehabilitation of substrates, subjected to rough environments with extreme wear and tear.

- » Exceptional chemical and corrosion resistance
- » Extended protection
- » Competitive costs
- » Long-term cost savings
