

Tufcote™ NISO 2K

Non-Isocyanate Cross Linked Acrylic Enamel Single Stage Topcoat

Agriculture, Construction & Earthmoving Equipment

Tufcote™ NISO 2K

Highlights

- Isocyanate Free
- 2K Acrylic 3.5 VOC cross linked enamel
- Developed and benchmarked against the performance requirements of several of the leading global agricultural manufacturers.
- Superior exterior weathering performance comparable to 2K urethane systems and supported with accelerated Xenon Arc data.
- Excellent chemical resistance properties (refer to TDS)
- Excellent flexibility and stone chip resistance (refer to TDS)
- 2:1 mix ratio and consistent across colour offer
- Pot life 12-24 hours (dependent on ambient conditions).
- Fast dry to handle time and can be accelerated for increased thru-put.
- Used in conjunction with Corlar 3.0 epoxy primer which can be recoated in 5 minutes.
- Colors-wide availability of mainline agricultural and construction colors
- Application-low/high pressure systems
