

InventU

Your Passion. Our Coatings.

Axalta is a leading global company focused on providing innovative, colorful, beautiful and sustainable paint coating solutions. From cars and trucks, to electric motors and skyscrapers, our coatings are designed to prevent corrosion, increase productivity and enable the materials we coat to last longer.

Learn. Grow. Connect.

InventU Program

Our internship program is designed to give insight into career paths available at major, multi-national corporations. We assign our interns to departments and business units that match their expressed field of interest. Each intern's key project contributes directly to the company's performance. Former interns have made lasting, visible impacts and left with strong portfolios of work.

Internships are offered in most major disciplines, including finance, legal, engineering, chemistry, marketing, procurement and sales, among others.

Key Project Program

Each intern is assigned one or more Key Projects, which serve as their primary focus for the duration of their summer internship. Key Projects are designed to:

- help evaluate a specific career path in a fast-paced, real world environment
- allow interns to learn among skilled leaders in their field
- have distinct and direct business and education value
- develop communication and public-speaking skills

Execu-Com Series

Each week throughout the program, a member of Axalta's senior management team will:

- explain their role at the company
- share experiences that have influenced their career
- host a real-time question and answer forum

Social Responsibility

Interns will also have the opportunity to learn about Axalta's corporate social responsibility (CSR) efforts. We focus our support in two major areas:

- science, technology, engineering and mathematics (STEM) initiatives and organizations
- sustainability initiatives that foster environmental stewardship and resource conservation
