

# Your Passion. Our Coatings.

Axalta's passion has made the world more colorful for more than 150 years. Our coatings are used on small and large surfaces, from cosmetic compacts and alternators, to helmets, guitars, race cars, rollercoasters, playgrounds, and skyscrapers. Our passion goes beyond the surface. We look for ways to also brighten our communities by focusing on programs that are related to Science, Technology, Engineering, and Mathematics (STEM) education, sustainability, and being a great corporate neighbor.

We are committed to providing customers with quality, innovation, and the delivery of exceptional products everyday.
