

AXALTA COATING SYSTEMS

High Performance Coatings for Rail

Axalta has built a legacy of coatings expertise for more than 150 years.

About Axalta

Axalta is a global leader in the coatings industry, providing customers with innovative, colourful, and beautiful coatings solutions. With more than 150 years of experience in the coatings industry, the global team at Axalta continues to find ways to serve our more than 100,000 customers in over 140 countries better every day with the finest coatings, application systems and technology. From applications in light and commercial vehicles to performance coatings for industrial and vehicle refinishing customers, our coatings are designed to prevent corrosion, increase productivity and enhance durability.

Axalta is a key supplier of protective coatings to the railway industry around the world. Our close co-operation with manufacturers, operators and official agencies in this field has resulted in a comprehensive offering of high-performing state-of-the-art products combined with an expertise in applications, efficiency management, advice and service.

Both the OEM and refurbishment sectors, including passenger carriages, high speed trains, locomotives, tramway and metro, can count on our combined offering of liquid and powder coatings approved by different railway institutes. We can help select the best performing and cost-effective coating systems for the right substrate, metal or phenolic/glass reinforced plastic. Our products are available in a wide range of colours and gloss levels, with outstanding properties.

Your global partner in coating excellence.

With decades of technical expertise and a commitment to partnership, Axalta delivers coating systems that enhance reliability, streamline processes, and protect your assets for the long term.

Industry Expertise

Our experienced industry professionals partner with you to understand your specific quality, productivity, and lifecycle goals. We design efficient, tailored paint processes, eliminating unnecessary process steps, reducing waste, and optimizing cost per unit without compromising quality.

Exceptional Service

Axalta's extensive network of experts supports your coating needs every step of the way. From colour and marketing guidance to product delivery, our representatives are ready to provide the knowledge, tools, and service you need to succeed.

It's not just a can of paint. Axalta offers:

- Customer-focused solutions
- Problem-solving expertise
- Process development and optimization
- Commitment to consistent quality
- Sustainability focused practices
- Expert training in products and application
- A lasting customer partnership

Coating solutions engineered for railways worldwide.

Axalta's rail coatings deliver strong, lasting colour and superior protection for railway operators around the world. Our global product portfolio ensures consistent quality and performance, meeting international standards while adapting to local requirements.

Technologies include:

Waterborne

High-performance coatings that help lower emissions while maintaining appearance and durability.

Solventborne

Provides long-lasting protection and high-quality finish.

E-Coat

Uniform coverage and corrosion protection.

Liquid Coatings

An environmentally responsible coating solution featuring a unique range of waterborne products with outstanding graffiti resistance and excellent smoke-fire-toxicity features. Suitable for metal and phenolic/glass-reinforced plastic substrates.

Available systems:

- 2K WB/SB Epoxy Primer
- 2K WB/SB Polyurethane Filler
- 2K WB/SB Topcoat
- WB/SB Basecoat
- 2K WB/SB Clearcoat
- 1K WB/SB Underbody Coating

Our industry leading Brands:

- Imron™
- AquaEC™
- PercoTop™
- Centari™ 600

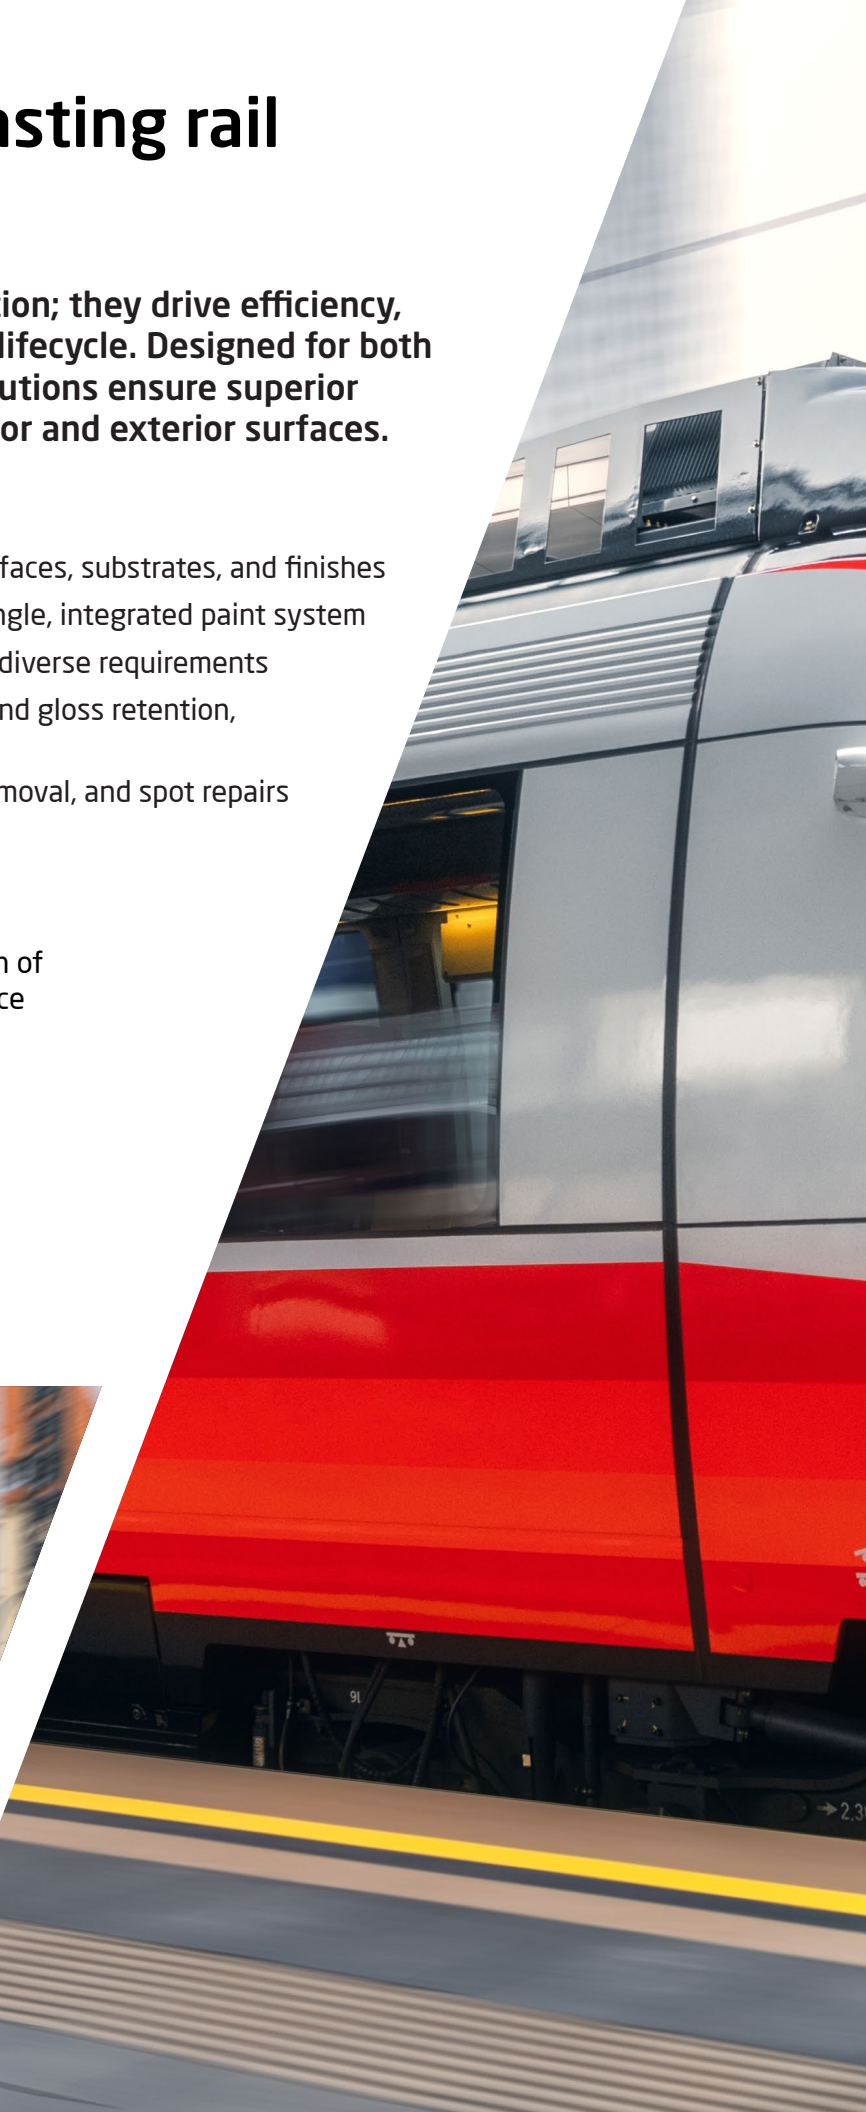

Coating systems for lasting rail performance.

Axalta coatings provide more than protection; they drive efficiency, reliability, and value across the entire rail lifecycle. Designed for both manufacturing and refurbishment, our solutions ensure superior performance on metals and plastics, interior and exterior surfaces.

Key benefits include:

- Comprehensive solutions covering multiple surfaces, substrates, and finishes
- Enhanced productivity and flexibility from a single, integrated paint system
- Extensive colour and finish options tailored to diverse requirements
- Durable performance with exceptional colour and gloss retention, resistant to marring and scratches
- Simplified maintenance for cleaning, graffiti removal, and spot repairs
- Compliance with EU environmental standards

Rail networks face constant strain, which demands coatings that endure. The life of a train car or section of track, the on-going cleaning, duty cycles, maintenance and upkeep costs are factors as important as the original investment. From raw materials to finished products, Axalta solutions are engineered for maximum durability, cost-effectiveness, and quality, providing lasting value through the lifecycle.

Trusted and certified for rail applications.

Axalta's liquid and powder coatings are recognized and approved by leading railway authorities worldwide, including:

- Deutsche Bahn (DB) approval
- UK Rail approval
- Fire safety approvals to EN45545, BS6853, DIN5510

With decades of expertise, Axalta has developed specialized coatings tailored to the unique demands of the rail industry, delivering solutions that meet the specific paint specifications of 20+ rail OEMs and refurbishment sectors.

We innovate smarter surface solutions for better living and a more sustainable future.

Through continuous investment in research and development, we design rail coatings that can help use fewer resources, lower emissions, and minimize environmental impact, while maintaining the highest standards of performance.

Across our global operations, we are committed to advancing a culture of safety, integrity, and inclusion, ensuring that our people, customers, and communities thrive as we work together toward a cleaner, sustainable future.

- **Sustainable design** - products developed with efficiency and long-term durability in mind
- **Responsible manufacturing** - strong focus on waterborne and low-VOC coating technologies
- **Global commitment** - supporting customers in achieving their own sustainability goals
