PercoTop 9600 2K MS Topcoat

Some customers want the greater quality provided by a medium solids system. Others don't have to operate to strict VOC legislation. This is a 2K medium-solids polyurethane solventborne topcoat which offers a high-gloss appearance, good flow, dries quickly and delivers excellent long-term colour and gloss retention.

PercoTop 9675 2K HS Topcoat

This 2K high solid polyurethane topcoat is the preferred choice when complex shapes and large surfaces require an excellent finish. PercoTop® 9675 has good flow and appearance and delivers excellent long-term colour and gloss retention. It has been optimised for electrostatic and air-mix applications. PercoTop 9675 is our flagship topcoat and the standard choice for most applications requiring a smooth and glossy finish.
